

Hub & Spoke System Grantee Profile: Janus of Santa Cruz (North)

The California Hub & Spoke System (CA H&SS) is a component of the California Medication Assisted Treatment (MAT) Expansion Project, and is being implemented as a way to improve, expand, and increase access to MAT services across the state. Each CA H&SS consists of a “Hub” that serves as the addiction center of expertise, and multiple “Spokes” that act as clinical service providers.

About:

The Central Coast H&SS North is a managed and coordinated medication-assisted treatment system of care. The Janus Narcotic Treatment Program (NTP) plays a central position of managing patient care while facilitating access to other treatment services, including interfacing and coordinating with Spoke providers of primary care, health homes, medical foundations, and behavioral health treatment programs.

INNOVATIONS

Advertising. Janus of Santa Cruz is developing public service announcements and paid advertisements to be aired on local television and radio stations in an effort to increase the awareness and visibility of the Central Coast Recovery Options (CCRO) program, as well as to alert potential patients about the availability of this service to them.

Increasing Access to MAT in Latino

Community. Central Coast demographics include specific populations to consider when developing treatment strategies. This includes the Latino population, undocumented individuals, and migrant farmworkers. In an effort to ensure outreach and engagement of this population, the CCRO program staffs bicultural/bilingual personnel and provides patients materials that are developed specific to low literacy English and Spanish speaking populations.
